PROFESSIONAL EXPERIENCE

CLEVERGROUND TECHNOLOGY PVT. LTD - PUNE   May 2023 - Aug 2023

Frontend Developer (INTERNSHIP)
During my internship, I worked on a project, contributed innovative ideas, and learned from experienced mentors. It Improved my technical skills, communication, and teamwork abilities. I worked with diverse teams and gained valuable Insights into the industry. The nurturing work culture boosted my confidence and reinforced my passion for the field, leading to both professional and personal growth.

PROJECTS
INTERNSHIP PROJECT
Developing CG-Portal Data Capturing Module to Automate a NAAC Reports. (ReactJS)

- Details: The "CG-Portal" project is a data capturing module designed to automate NAAC (National Assessment and Accreditation Council) reports for higher education institutions. It utilizes React JS for the frontend and Python for the backend. The module includes user-friendly forms for data entry, integration with existing systems like the Learning Management System (LMS) Port, and access to historical and current data under one umbrella. The system aims to reduce manual effort, ensure data accuracy, and streamline the NAAC reporting process. Proposed enhancements include improved user interface, advanced data validation, integration with external data sources, and enhanced analytics and reporting features. The project seeks to empower institutions to comply with accreditation standards and make data-driven decisions for continuous improvement.

MINI PROJECT
Recruitment Management System (PHP)
- I designed and developed a system that enables employees to search for jobs, which is fully responsive.

Online Food App (Android)
- Our platform is built on Android and offers full responsiveness. Customers can effortlessly order their favorite meals through our service.

Book Shop Management System (VB.Net)
- I designed and developed a fully responsive system that allows customers to purchase books of their choice.

Personal Portfolio (JavaScript)
- My responsive portfolio displays my proficiency in web development using HTML, CSS, and JavaScript. It functions as a digital resume that showcases my skills, education, and certifications for recruiters.

VOLUNTEER
I volunteered for the Tech-Fest event organized by our college. I managed the decorations, conducted surveys with Many colleges, and organized a coding battle with my team.
